PERSPECTIVES 2019

November
Friday 29

Disclosure

Speaker name: PERNOT Mathieu

I do not have any potential conflict of interest

Patient presentation

Mr A.

- Year of birth : 1966
- Tobacco weaning

Cardiac history

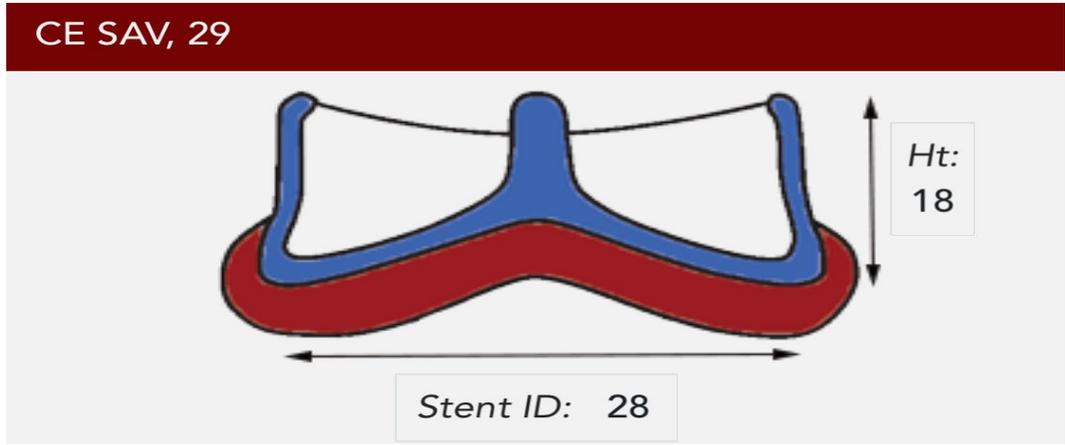

- Bicuspid aortic valve
- 2010: “Bentall” cardiac surgery, with biological valve implant, CARPENTIER EDWARDS de 29 mm and tube of Dacron
- Pacemaker, post operative AVB

Extra-cardiac history.

- Invasive epidermoid carcinoma without primary cancer diagnosed
- Nodal metastasis
- Chemoradiotherapy

Current observation

- Bioprosthetic valve degeneration
- Left heart failure
- LVEF 30%

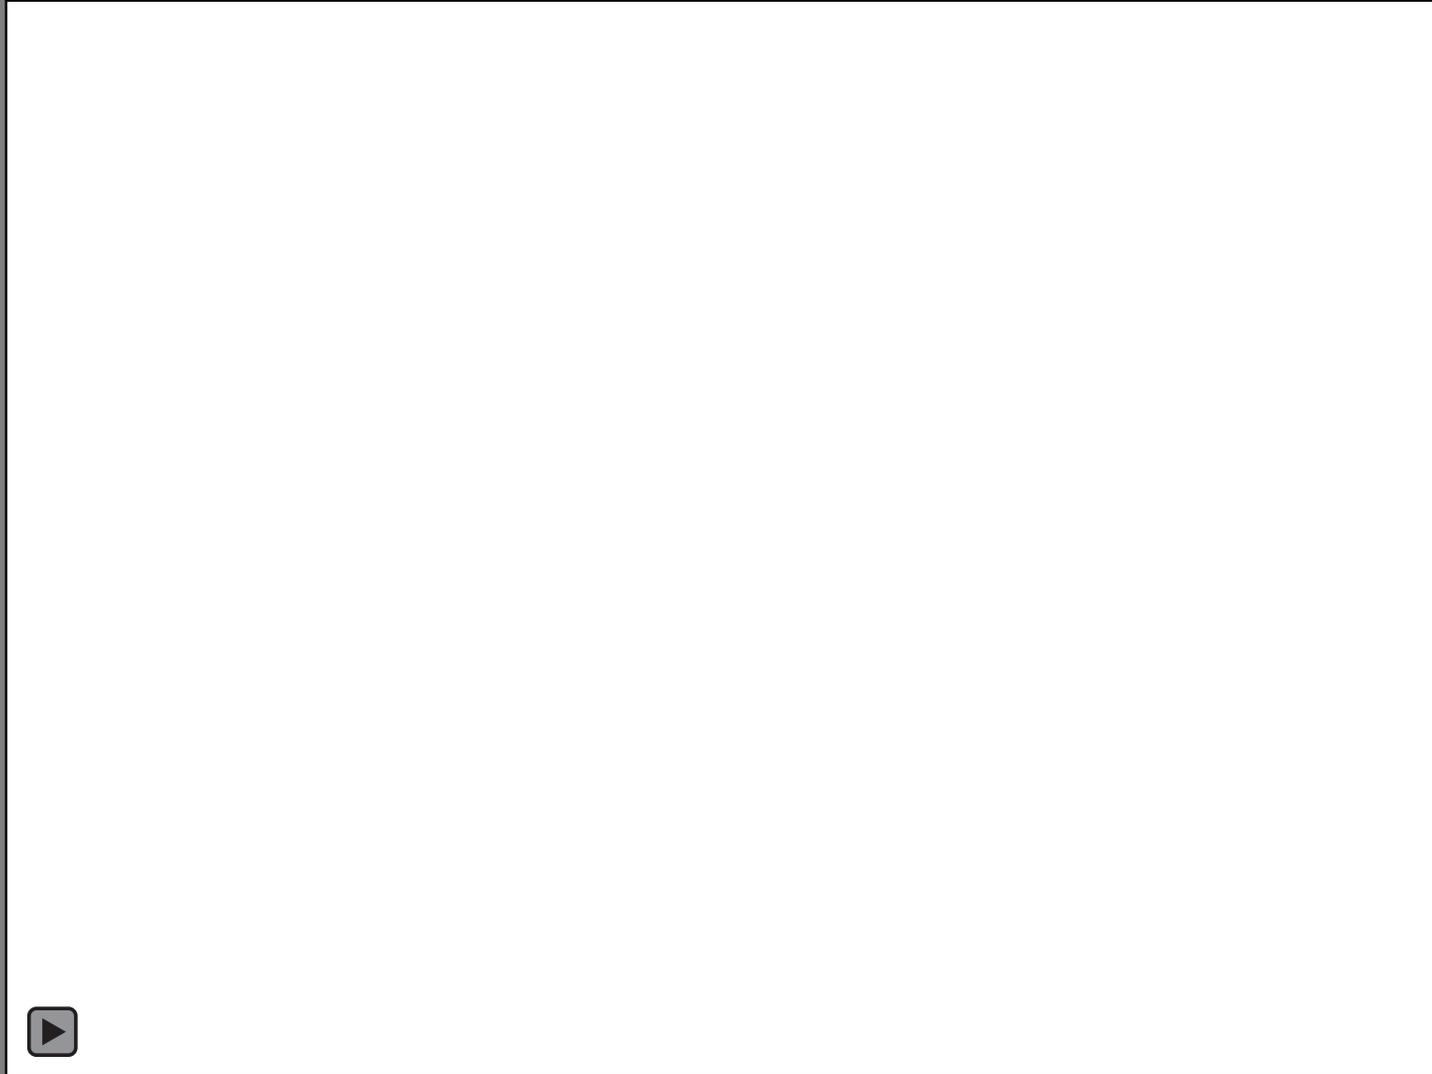

< Valve Size

TAVI Valve Choices For:
CE SAV, 29

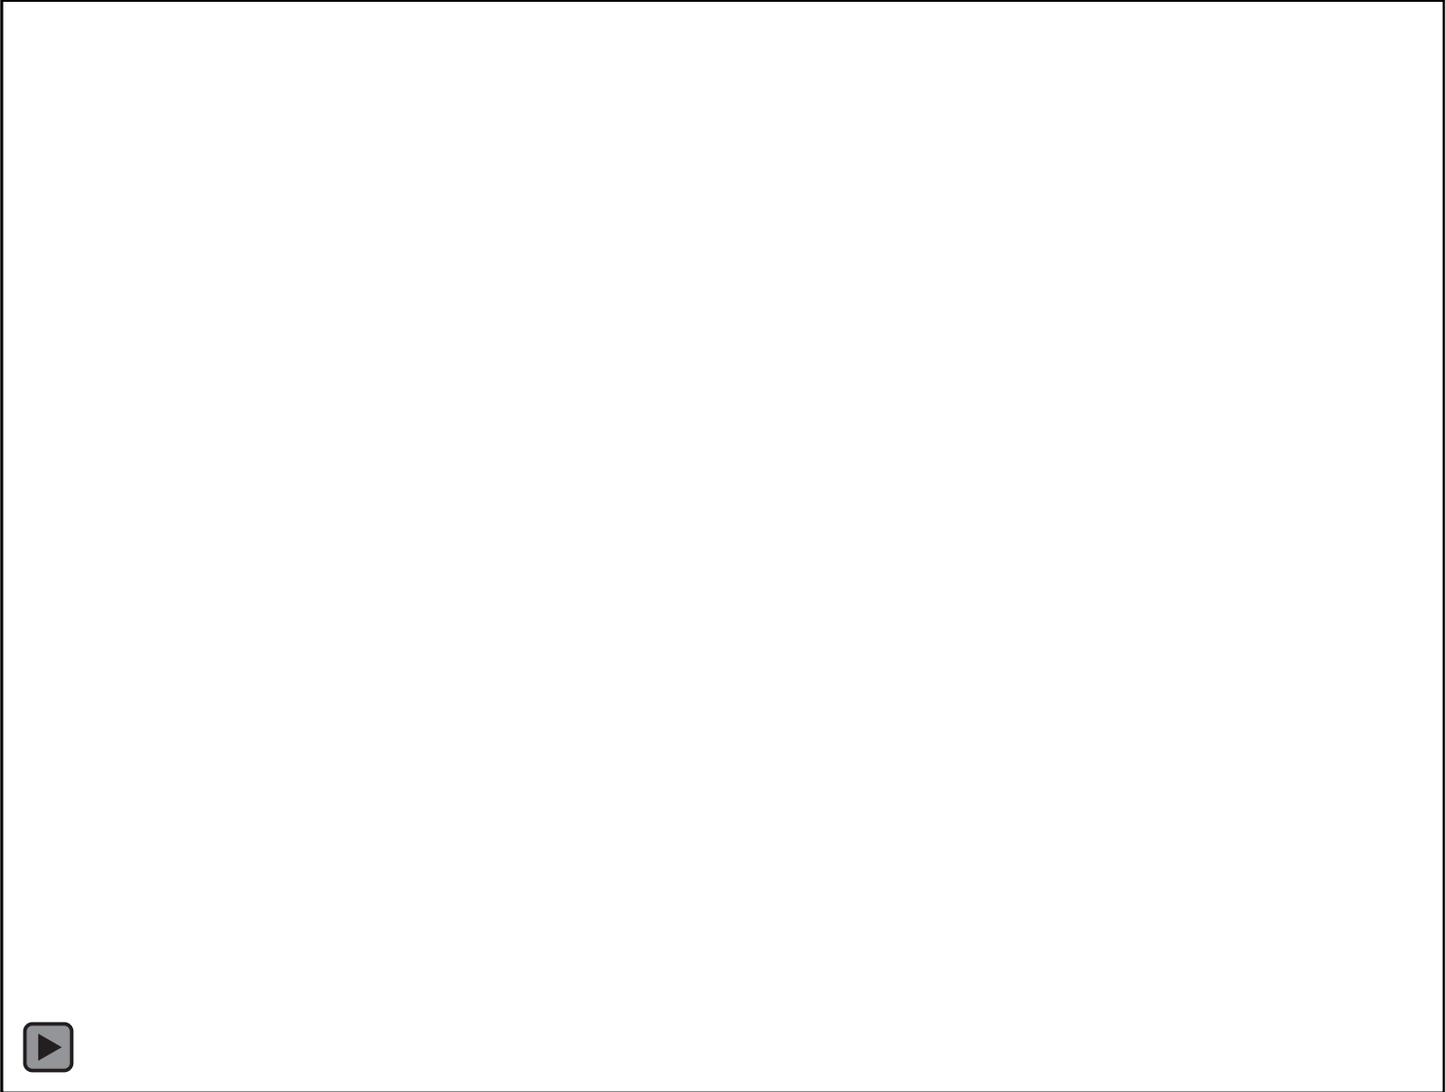

S3 26/29	Evolut R 29

Device choice

Valve in Valve procedure

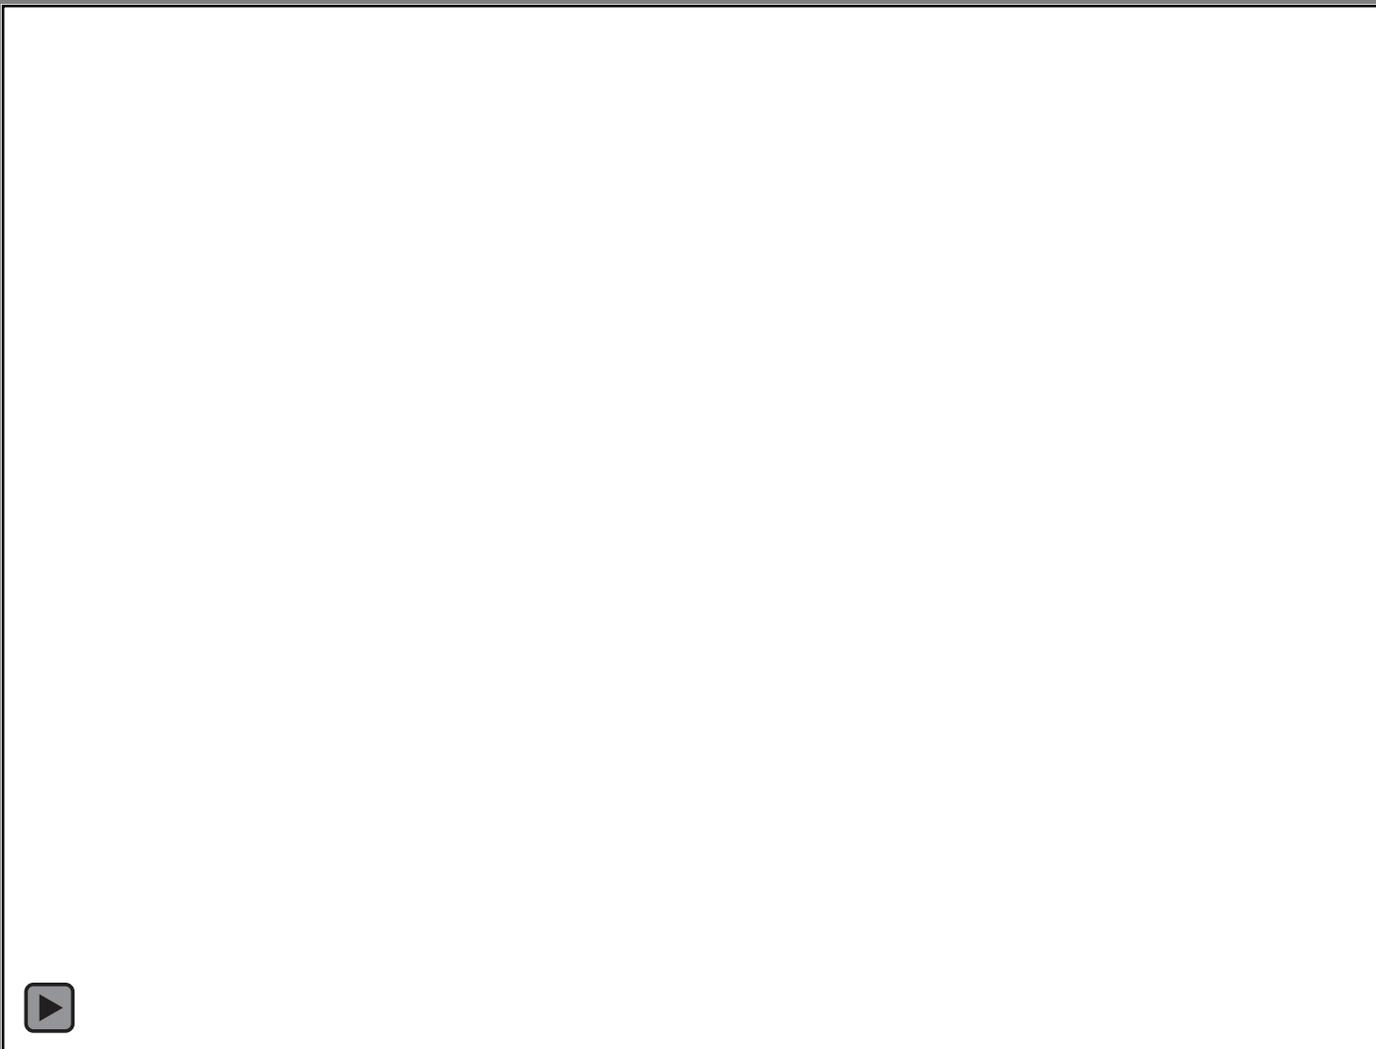

Valve Release

Aortic Insufficiency

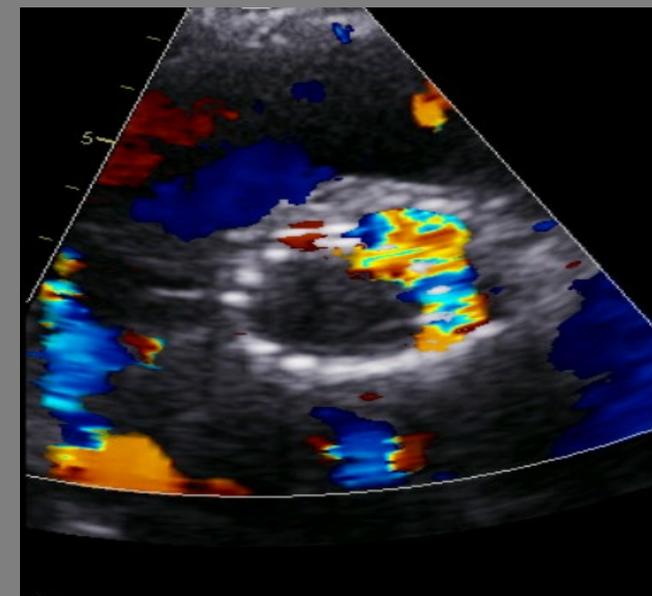

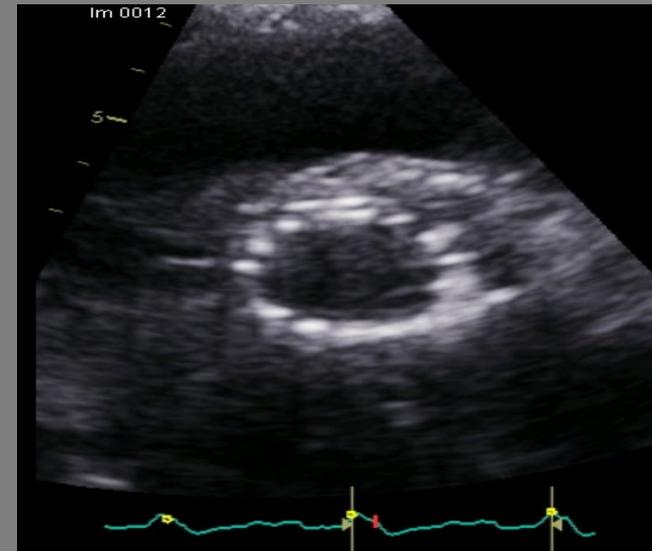

Aortic Insufficiency

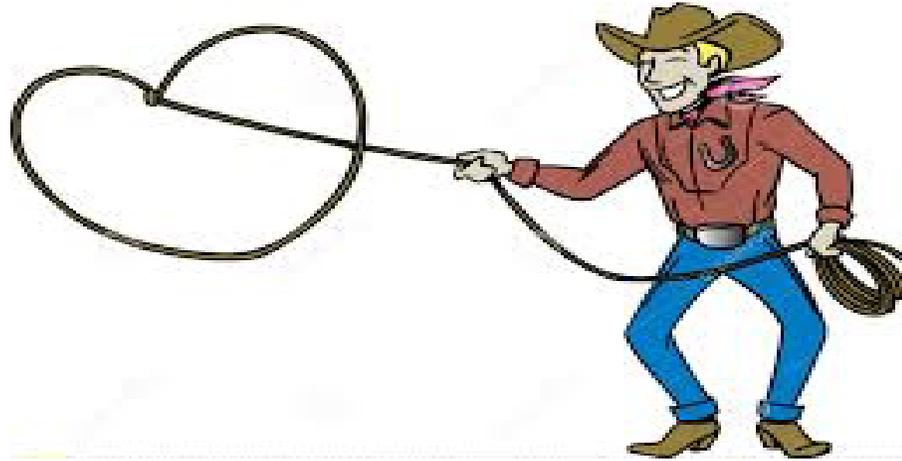

**Post-dilatation
Numed Balloon
28mm**

Aortic Insufficiency

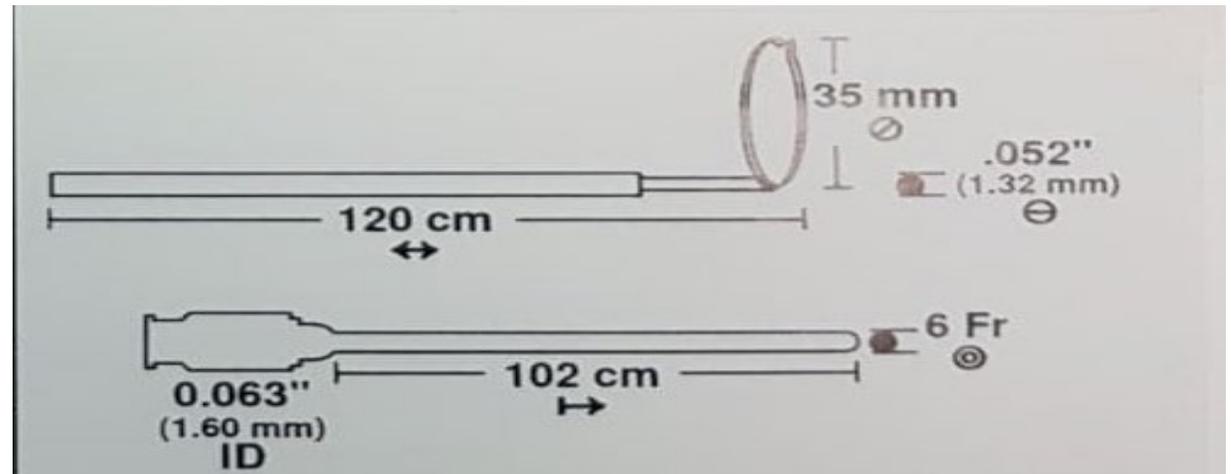

Snare Kit, "Lasso"

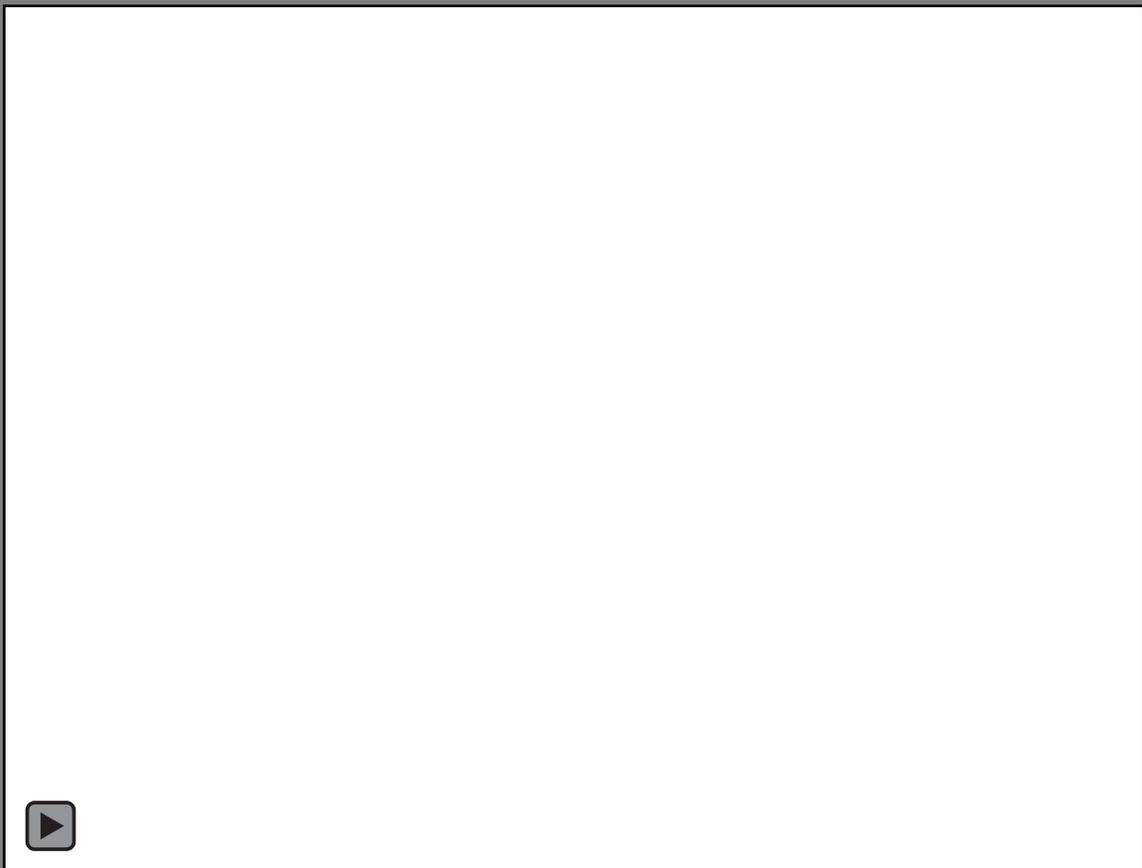

Snare Kit including Loop snare and 6.0F Snare Catheter

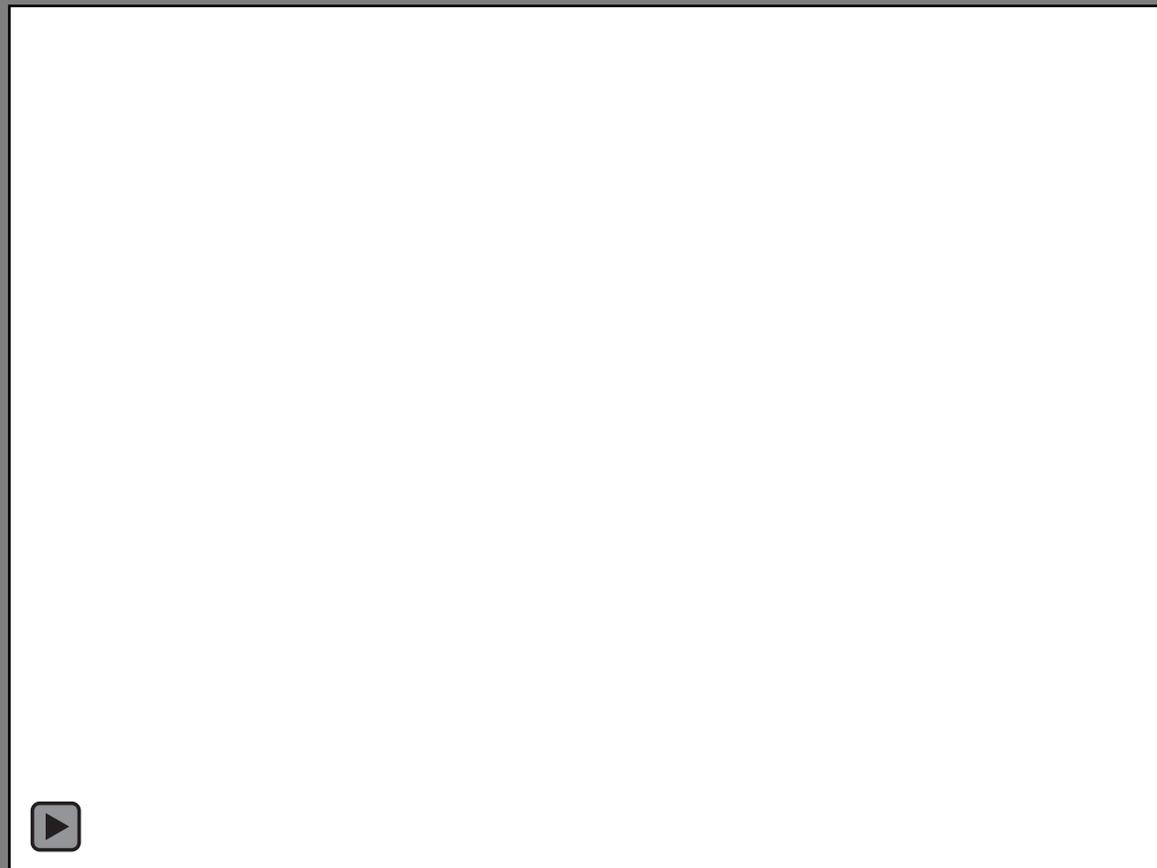

120 cm ↔	35 mm ∅	.052" 1.32 mm ⊖
102 cm →	6 Fr ⊙	.063" 1.60 mm ID

« lasso »

Femoral access

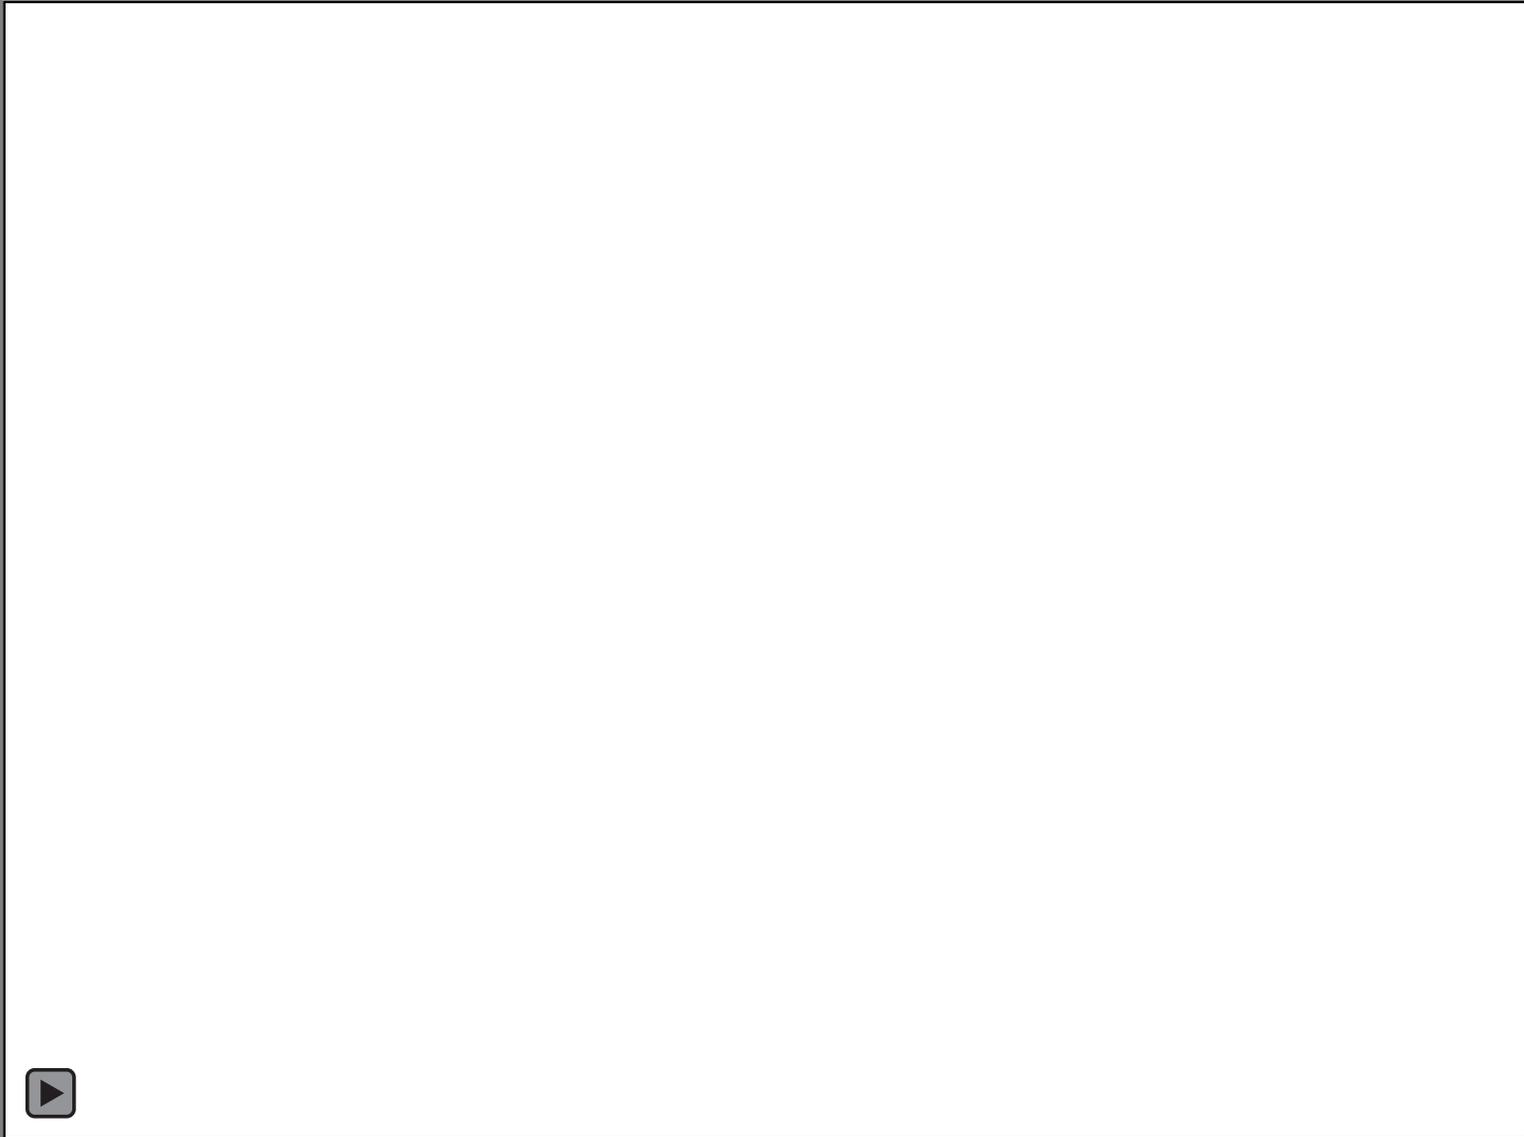

Radial access

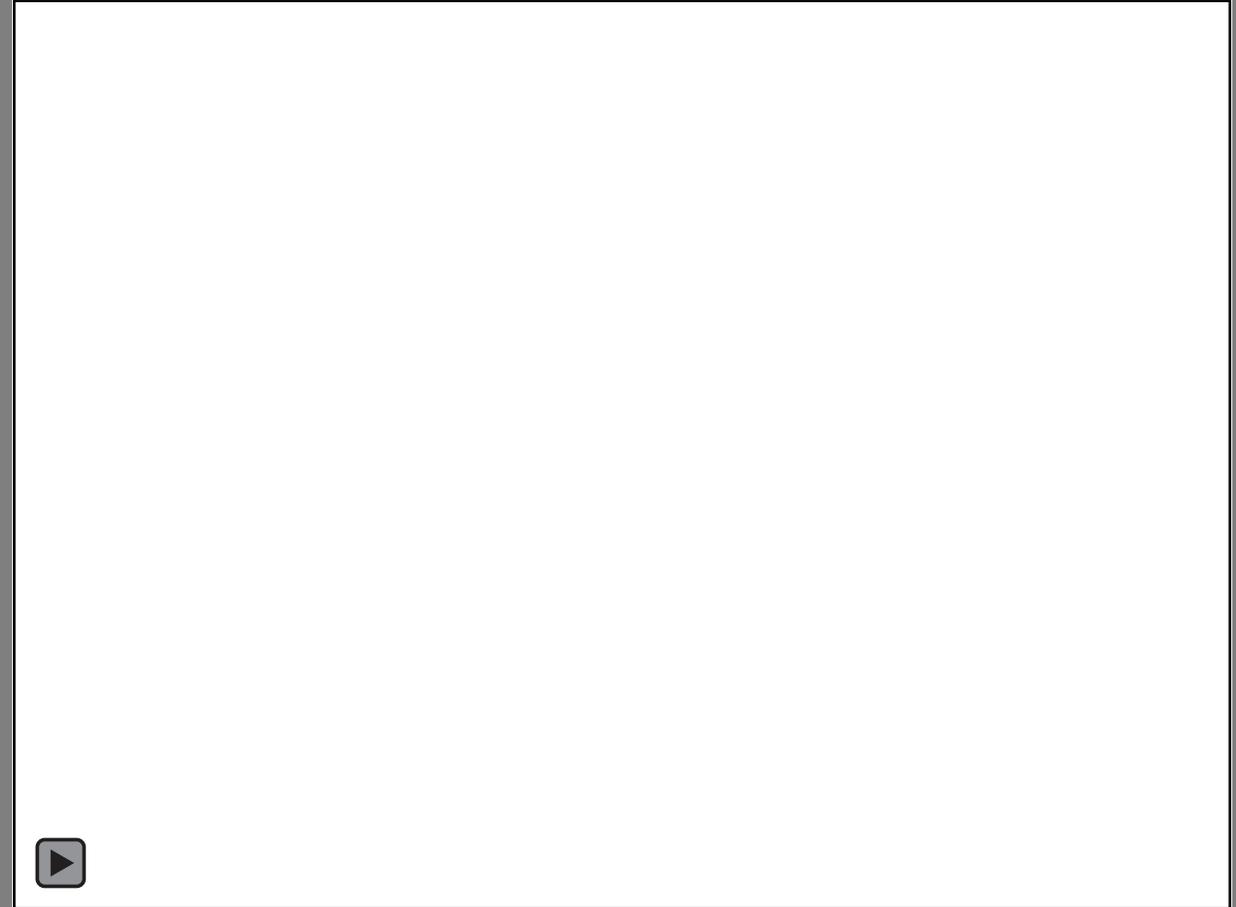

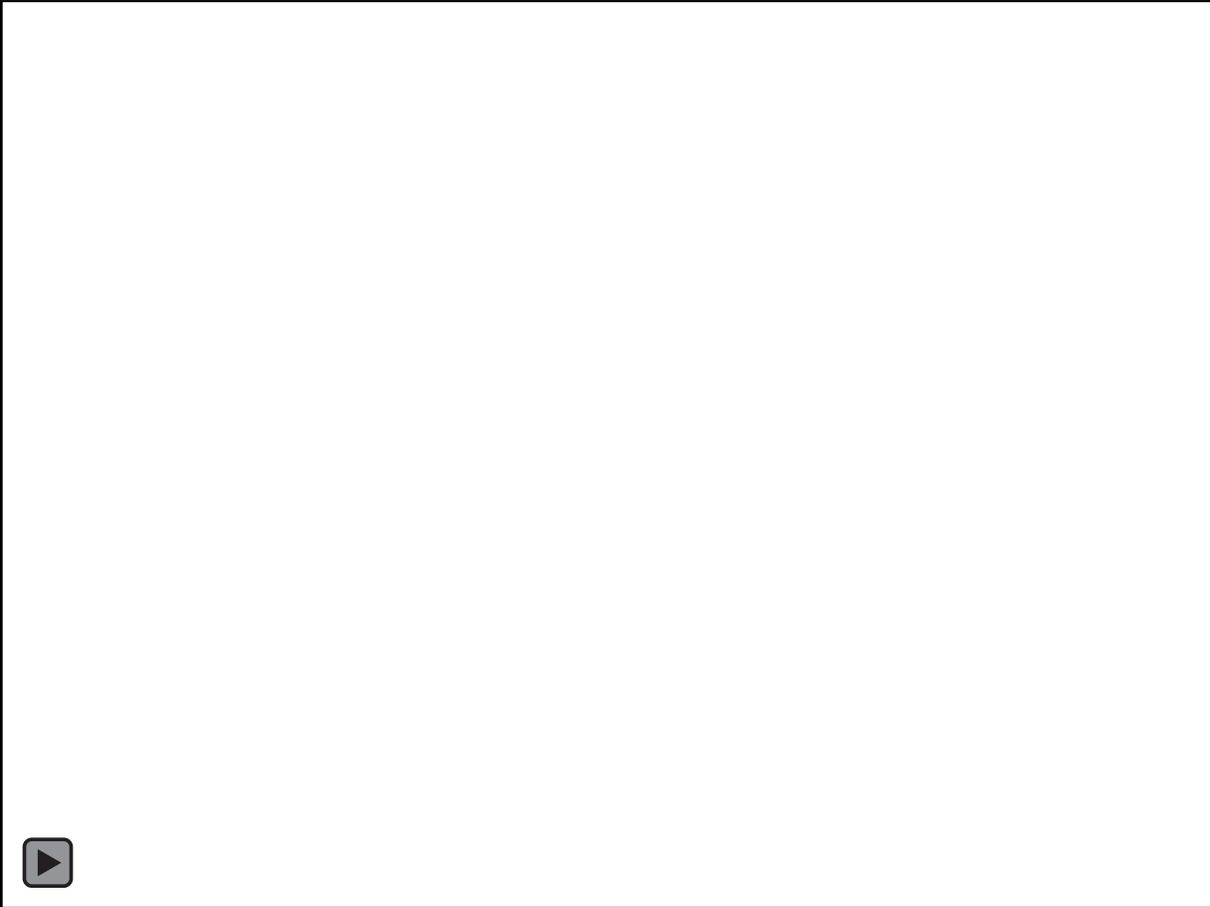

« lasso » by radial access and valve jump

Angiography

Second Valve Release

Edwards Sapien3 29

Second Valve Release

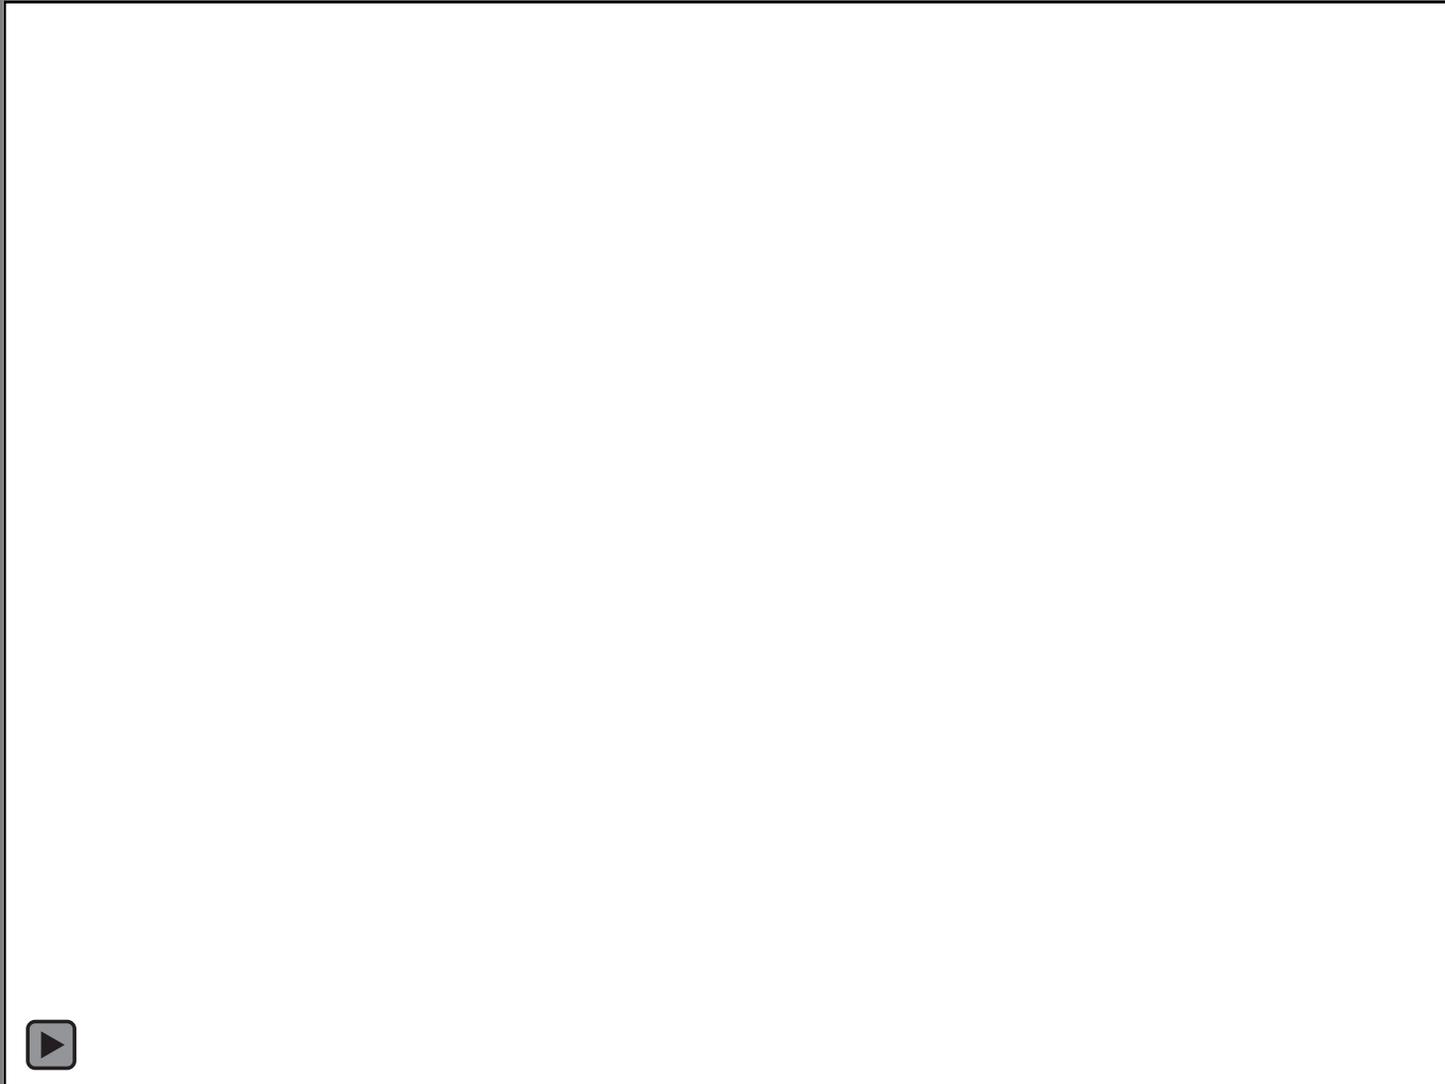

Angiography

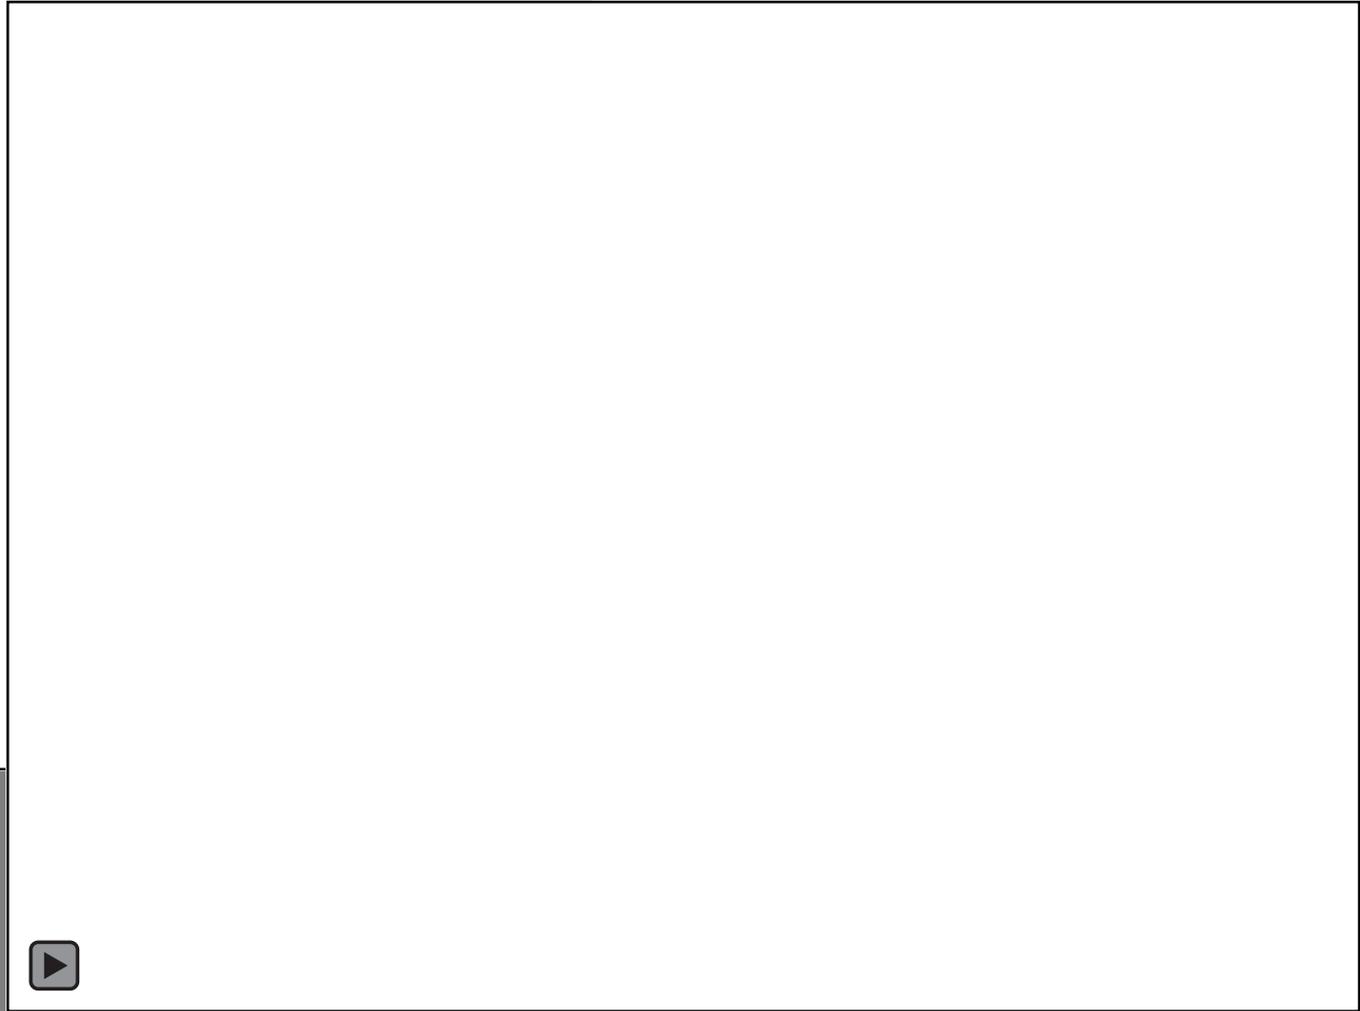

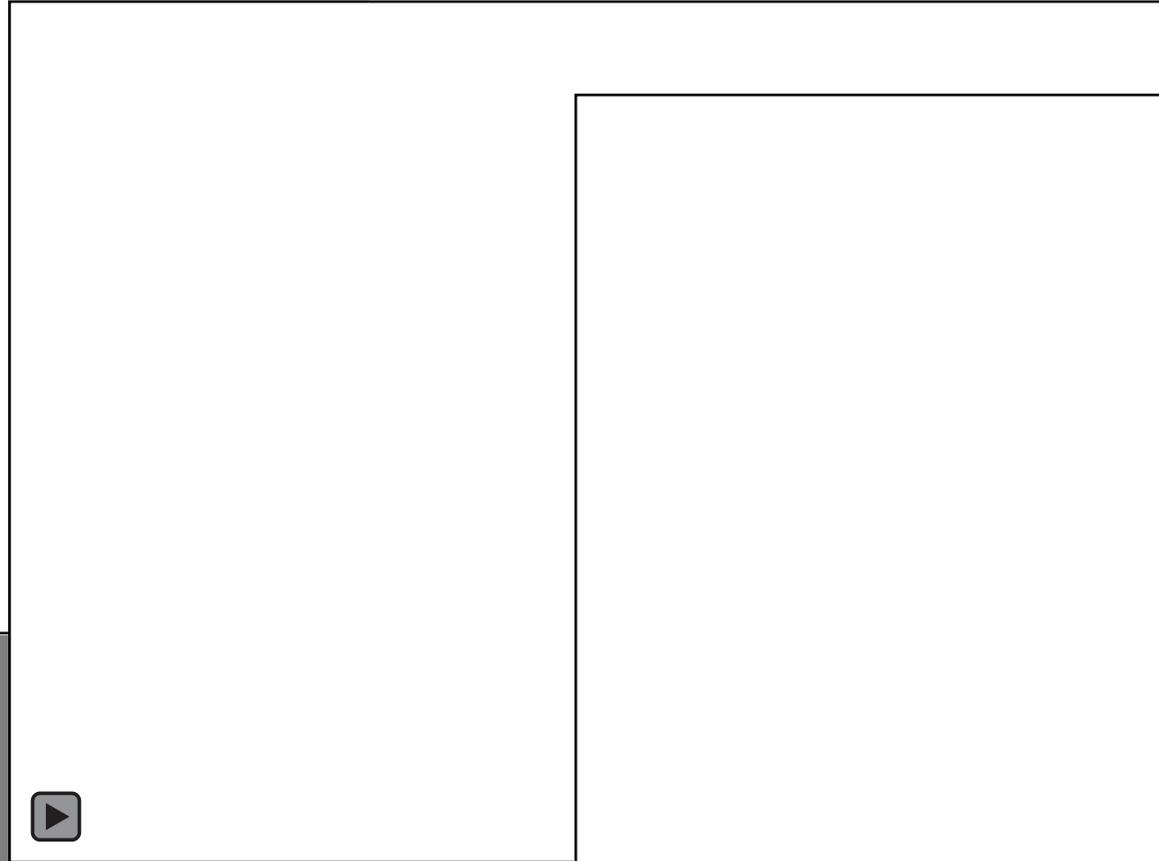

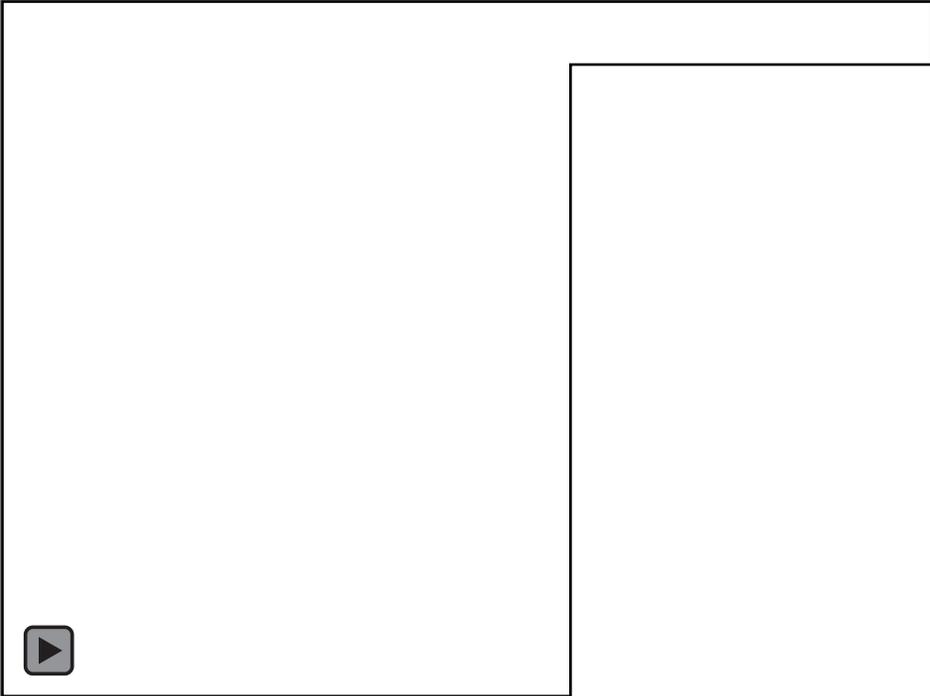

Loop Snare too low : bad move !!

Loop Snare trapped

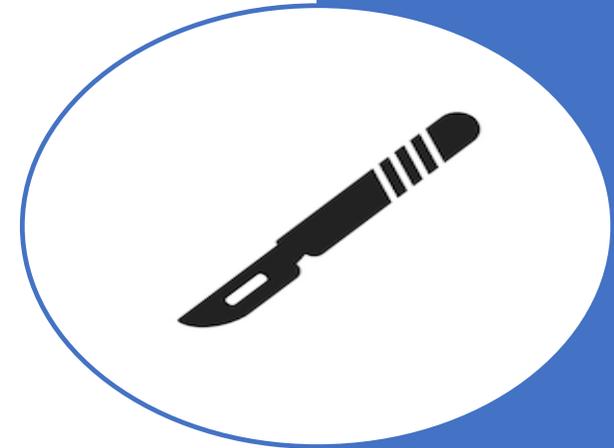

Try of Loop Snare deliverance

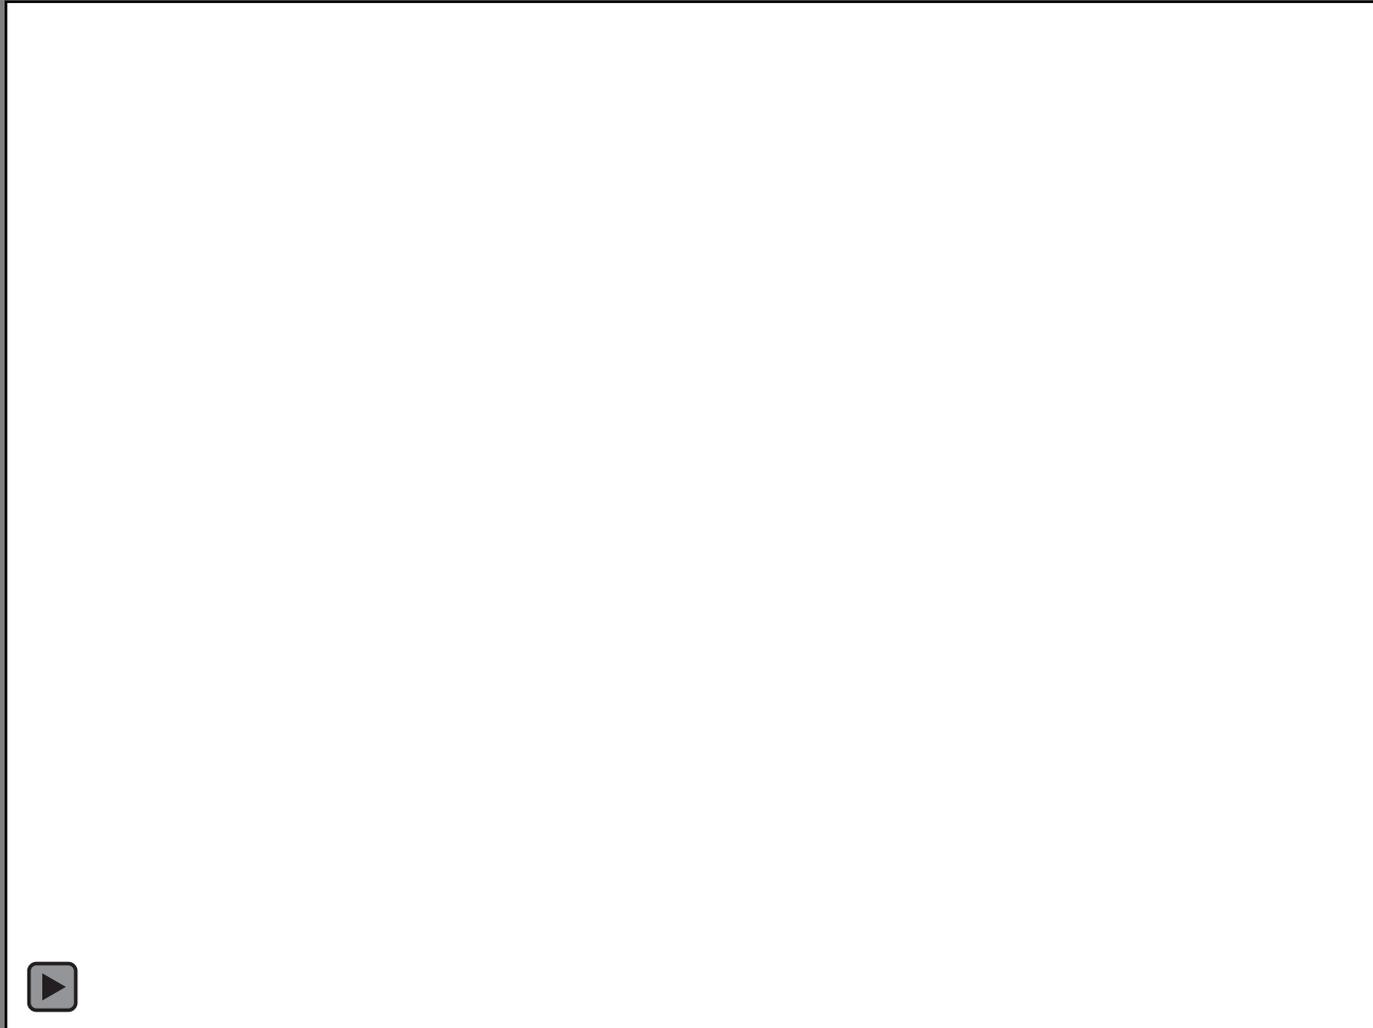

Failure of Loop Snare deliverance

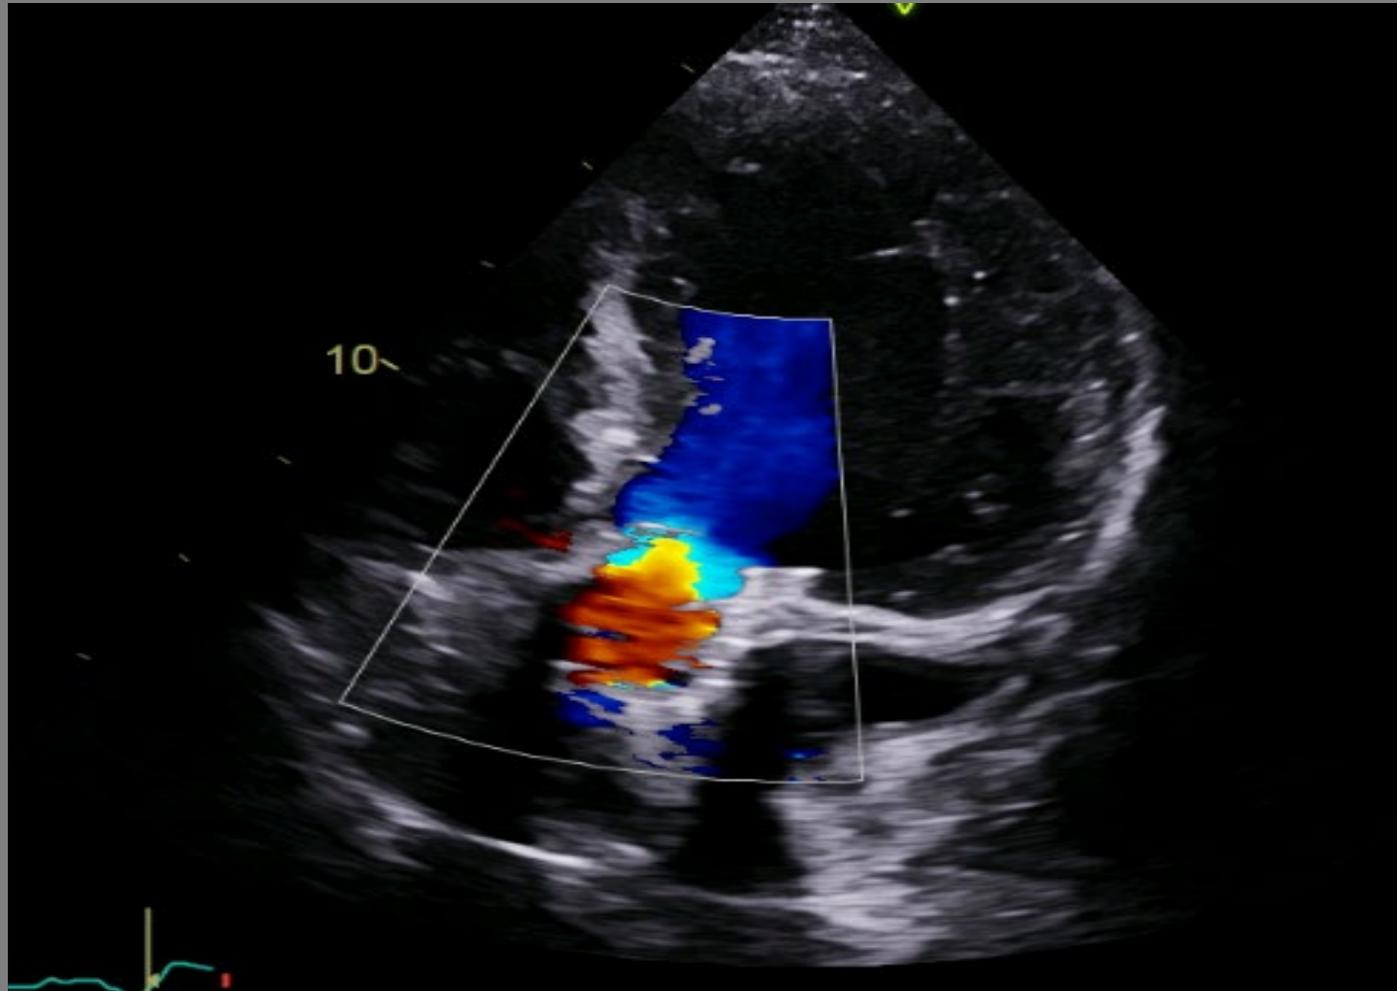

- Multidisciplinary discussion
 - Let the Loop snare inside
 - Avoid vascular trauma (by arm movement)
- Intervention plan
 - Secure the Loop Snare
 - by a subclavian artery stenting
 - Surgical approach
 - Left Subclavian Artery Access
 - Cut the Snare extremity

After surgery and Loop Snare Extremity Cut

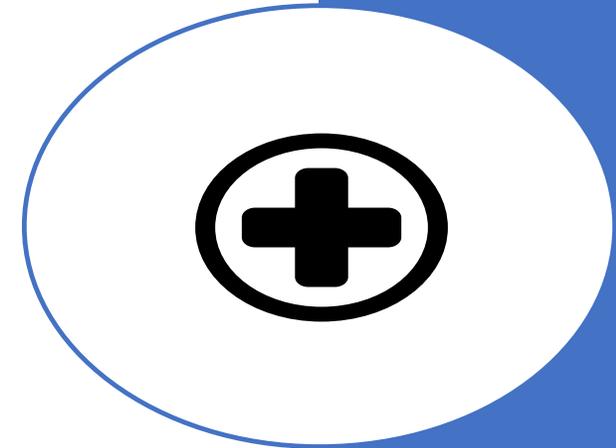

Final Trans-thoracic echography

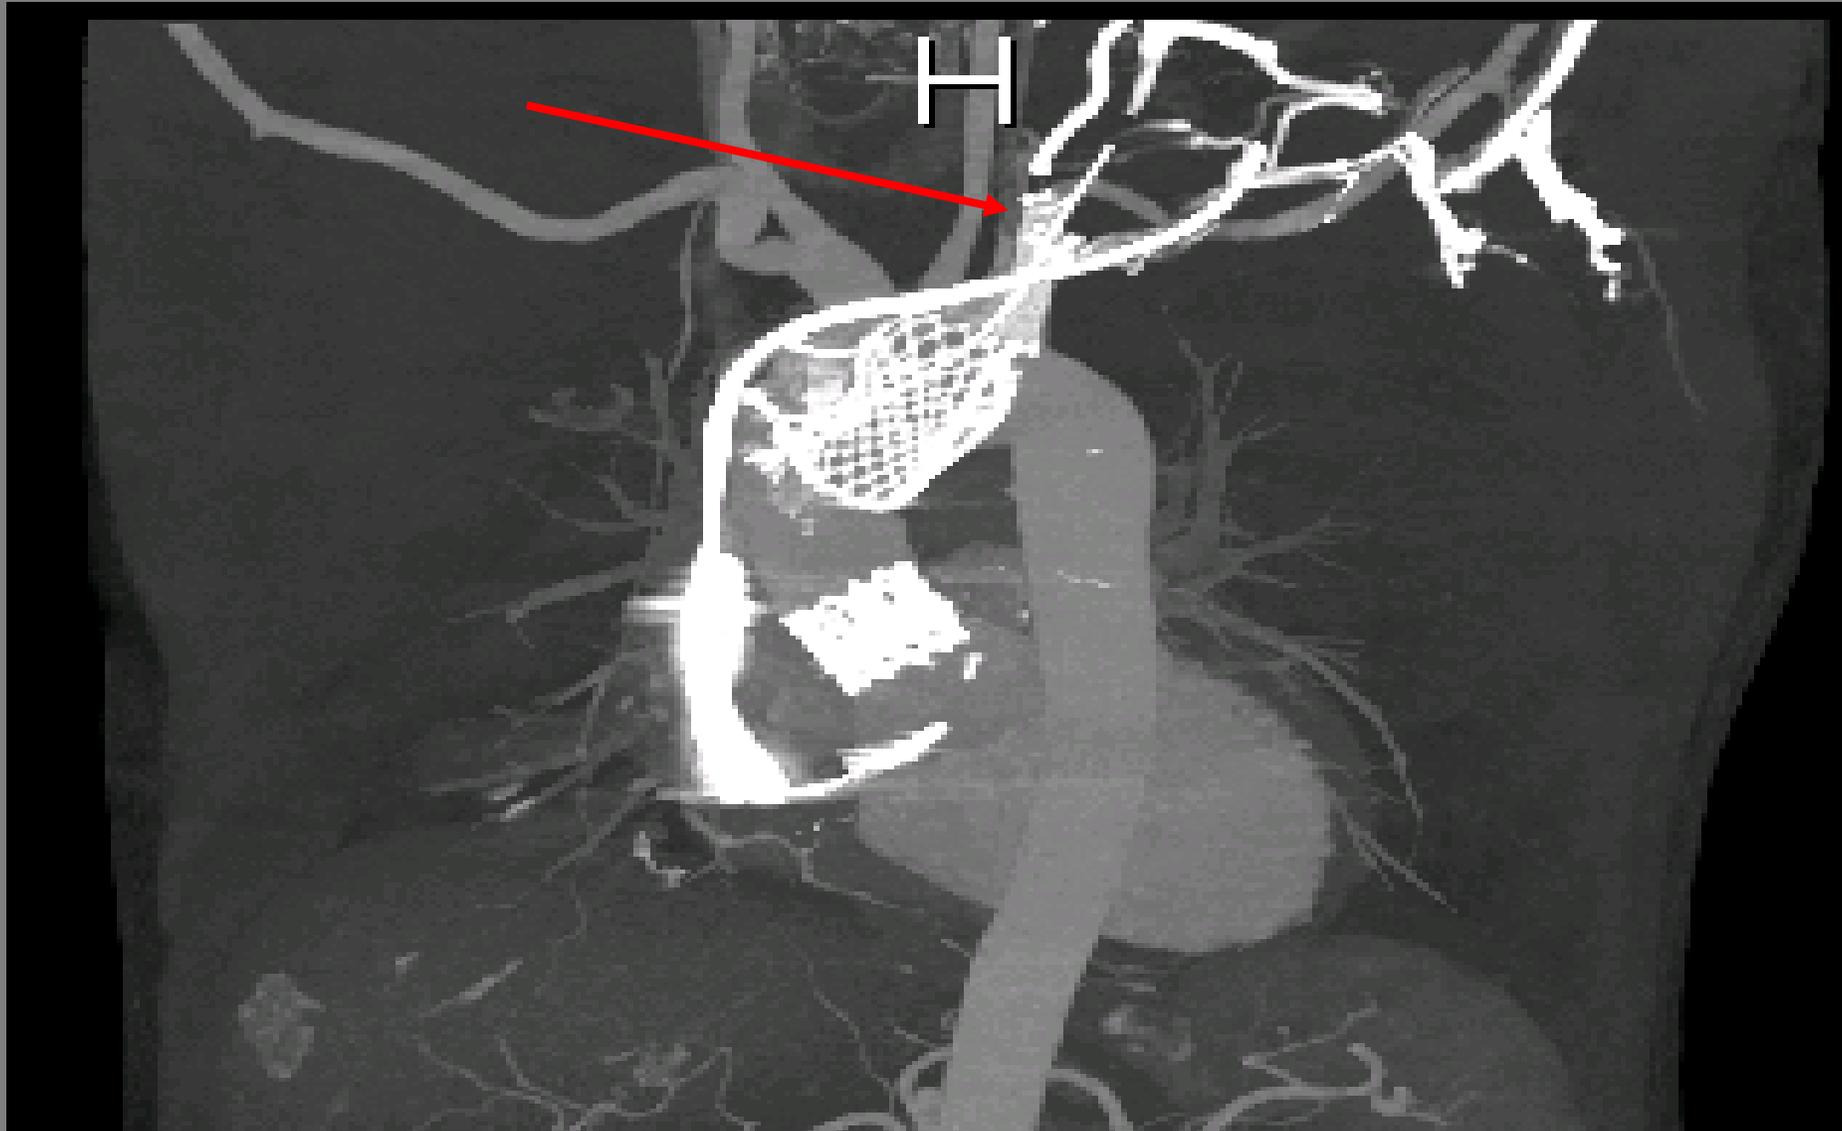

Medical follow up +6Months

- Clinical observation
 - No chest pain
 - No unusual bleeding or bruising
 - Persistent dyspnea
- Final Trans-thoracic echography
 - Edwards functional
 - LVEF 30%
- Discussion
 - Upgrade PM => Resynchronization
 - Computerised tomography (CT) control

CT Control – M6

CT Control – M6

The moral of the story

If you use a lasso...

The moral of the story

If you use a lasso...

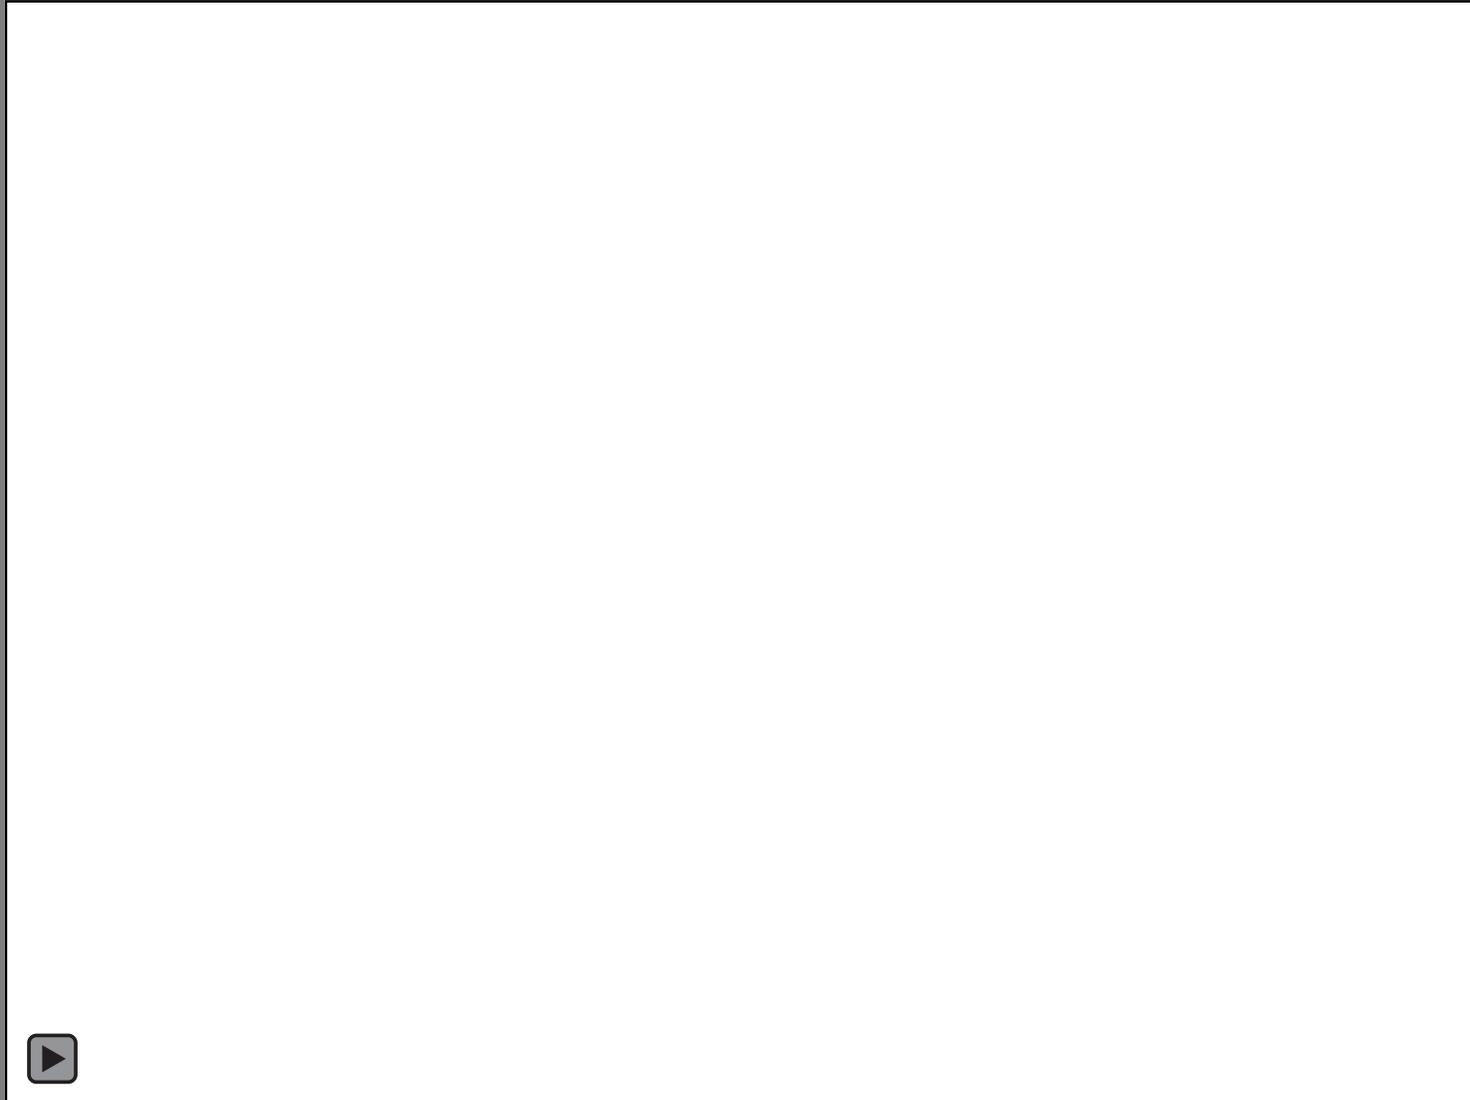

... be careful not to trip over yourself

Thank you for your attention

Left subclavian artery stenting

**Stent Luminex
7x40mm**
